

Lunar Surface Systems

October 2007

CONSTELLATION

Develop an infrastructure on the Lunar Surface that will enable Constellation to meet its goals for long term human exploration.

- ◆ **Early focus is on developing an architecture that is:**
 - Consistent with the Ares and Lunar Lander capabilities currently in development
 - Meets technical and political objectives
 - Fits a budget profile
 - All at an acceptable risk level
- ◆ **Aiming towards Mission Concept Review activities in FY08 and FY09. Systems Requirements Reviews to follow in FY10 and FY11.**
- ◆ **Will have participate in discussion about opportunities for international partners and commercial partners as guided by NASA Headquarters**
